

CUSTOMER & MVP

BLUEPRINT

Data Cleaning & Automation Service

"Upload messy data → get clean datasets, dashboards & insights in minutes."

■ PRODUCT STRATEGY

■ CUSTOMER RESEARCH

■ MVP ROADMAP

■ INDIA MARKET

SECTION 01

Executive Summary

Based on the Startup Validation Report, this blueprint defines WHO to build for, WHAT to build first, and HOW to reach Product-Market Fit. The Data Cleaning & Automation Service targets Indian SMBs, startups, and freelancers drowning in manual data work — a █4,200 Cr addressable market growing at 18–22% CAGR.

72/100	85/100	68/100	61/100
Customer Clarity	Problem Severity	PMF Potential	MVP Readiness

DIMENSION	STATUS	PRIORITY
Customer Segment Defined	█ SMBs, Freelancers, Students	HIGH
Core Problem Validated	█ Research-backed (60–80% time waste)	HIGH
MVP Scope Defined	██ Needs narrowing to 1 use case	CRITICAL
Pricing Model	██ Hypothesis stage — needs testing	HIGH
Distribution Channel	█ LinkedIn + Instagram + Direct outreach	MEDIUM
First Revenue Target	█ 0 clients — Day 1 priority	CRITICAL

SECTION 02

Ideal Customer Profile & Buyer Persona

Ideal Customer Profile (ICP)

ATTRIBUTE	PRIMARY ICP	SECONDARY ICP
Who	Indian SMB / Startup founder or ops lead	Student / Freelancer / Solopreneur
Industry	E-comm, Marketing, Finance, EdTech	Analytics student, Freelance consultant
Company Size	1–50 employees, no data engineer	Individual or 1–3 person team
Tools Used	Excel, Google Sheets, Power BI, Tally, Zoho	Excel, Google Sheets, beginner Python
Budget	■1,000–5,000/mo for tools	■299–999 one-time payment
Pain Frequency	Daily/weekly data chaos	Monthly project-based needs
Channel	LinkedIn, WhatsApp, referrals	Instagram, YouTube, student groups
Buying Signal	Pays for Canva/Notion — SaaS-minded	Price-sensitive; needs clear ROI proof

Primary Buyer Persona — 'Priya the Overwhelmed Founder'

PERSONA ATTRIBUTE	DETAIL
Name / Role	Priya S. — E-commerce / Marketing SMB Founder, 28–36 yrs, Bengaluru / Delhi / Pune
Goal	Reduce weekly reporting time from 3+ hours to under 30 minutes
Biggest Pain	Merges Shopify + Excel + Google Ads data manually every week — full of errors
Current Fix	Junior staff or VA — still inaccurate, still slow
Buying Trigger	Made a data error in a client report; lost time and credibility
Objection	'Are you reliable?' / 'What if my data is sensitive?' / 'Is this worth the cost?'
Dream Outcome	Send messy file on Monday morning → receive clean dashboard by noon
Where to Find Her	LinkedIn, Instagram business pages, WhatsApp founder groups, startup communities

SECTION 03

Top 10 Customer Pain Points

#	PAIN POINT	SEVERITY (1–10)	FREQUENCY	CUSTOMER QUOTE
1	Data errors caught only after presenting to clients/boss	10	Monthly	"I had to redo the entire report — so embarrassing"
2	Merging data from multiple files (Shopify + Excel + Ads)	8	Weekly	"Copy-pasting for hours and still getting mismatches"
3	Duplicate entries corrupting customer/order records	9	Daily	"I don't trust my own database anymore"
4	Monthly reporting takes 2–3 full days of manual work	10	Monthly	"I spend more time on reports than running my business"
5	Inconsistent date/number formats breaking formulas	8	Daily	"Half my formulas just show errors because of formatting"
6	Missing values breaking pivot tables and dashboards	9	Weekly	"The dashboard just crashes when there's blank data"
7	Cannot automate recurring weekly/monthly reports	8	Weekly	"I do the same thing manually every single Monday"
8	No visual dashboard — data sits in raw tables	7	Ongoing	"My boss just wants a chart, not 5 sheets of numbers"
9	Cannot connect CRM data with spreadsheet data	8	Weekly	"Zoho and Excel don't talk to each other at all"
10	No version control — wrong file sent to client	6	Monthly	"We sent 'Final_old.xlsx' to the investor by mistake"

SECTION 04

Customer Journey, Triggers & Objections

Customer Journey Map

STAGE	CUSTOMER ACTION	EMOTION	YOUR MOVE	METRIC
AWARE	Sees LinkedIn post about data automation	Curious	Post: '5 signs your data is killing your business'	Impressions / Saves
CONSIDER	Checks your profile, reads service description	Interested	Clear Notion portfolio + pricing page	Profile visits
EVALUATE	DMs you asking for pricing or sample report	Hopeful	Reply in <2 hrs; send 1-page service PDF	Response rate
TRIAL	Accepts free 1-file clean or 14-day trial	Excited	Over-deliver; add a bonus insight or tip	Trial conversion %
PURCHASE	Pays retainer or project fee	Relieved	Send invoice + onboarding checklist + WhatsApp welcome	First App Repeat
RETAIN	Sends new data monthly; asks for feedback	Satisfied	Monthly delivery + proactive suggestions	Churn rate
ADVOCATE	Refers friend; writes LinkedIn testimonial	Grateful	Referral discount + public thank-you	NPS / Referrals

Buying Triggers vs. Key Objections

■ BUYING TRIGGERS	■ KEY OBJECTIONS & RESPONSES
Data error caused client embarrassment or loss	'Too expensive' → Show ROI: '5 hrs/week × ₹400 = ₹8K lost vs our ₹2,999 fee'
End-of-month crunch — report due tomorrow	'I can do it in Excel' → 'How long did last month's report take you?'
Business grew; manual process can't keep up	'Is my data safe?' → NDA on signup + data deleted after delivery
Saw competitor using clean dashboards	'Are you reliable?' → Free trial + money-back first-project guarantee
Investor or client requested cleaner reporting	'You're a student' → Portfolio + SLA + testimonials do the talking
Calculated hours wasted on data prep	'One-time only, no retainer' → Offer project packages; upsell later

SECTION 05

MVP Recommendation

■ MVP THESIS: Don't build software. Sell the outcome manually first. Your MVP is a Done-For-You Data Cleaning Service delivered via WhatsApp/Email — not a product, not a SaaS, not a website. Prove someone will pay before automating.

What to Build First vs. What NOT to Build

■ BUILD FIRST (Week 1–4)	■ DO NOT BUILD YET
Service intake form (Google Form — free)	Custom web application or SaaS platform
1-page Notion or Carrd portfolio site	Mobile app
WhatsApp Business number for client comms	Paid ad campaigns
Python/Excel cleaning scripts (your toolkit)	Complex automation dashboard for clients
Standardised delivery template (clean file + insight summary)	Subscription billing system
Before/after case study visuals for content	Team hiring or outsourcing
Data NDA template (one Google Doc)	Branded merchandise or offline presence

MVP Success Metrics

METRIC	TARGET (30 DAYS)	TARGET (90 DAYS)	HOW TO MEASURE
Paying Clients	1 client	10 clients	Count of paid invoices
Monthly Recurring Revenue	■0 → ■3,000	■15,000+	Sum of active retainers
Trial-to-Paid Conversion	—	40%+	Paid / (Free trials given)
Avg Turnaround Time	< 24 hrs	< 8 hrs	Time from file receipt to delivery
Client Satisfaction	1 testimonial	5+ testimonials	Ask after each delivery
LinkedIn Engagement	200+ impressions/post	500+ impressions/post	LinkedIn analytics
Referrals Received	0	2+	Track source of each new inquiry

SECTION 06

MoSCoW Prioritization & Pricing Hypothesis

MoSCoW Feature Prioritization

■ MUST HAVE (Launch Blockers)	■ SHOULD HAVE (Month 1–2)	■ COULD HAVE (Month 3–6)	■ WON'T HAVE (Not Now)
- Manual data cleaning service - Delivery via Email/WhatsApp - Google Form intake - Data NDA template - Before/after case study - Basic pricing structure	- Notion/Carrrd portfolio page - LinkedIn content system - Referral incentive program 2–3 service packages - Client testimonial collection - Simple SOP documentation	- Pre-built template shop - Email newsletter / waitlist - YouTube/Instagram tutorials - Group data audit workshop - Automated intake + invoicing - Power BI report templates	- Custom SaaS platform - Mobile application - Paid advertising - Full-time hire - Enterprise contracts - Complex API integrations

Pricing Hypothesis

TIER	NAME	PRICE	WHAT'S INCLUDED	TARGET SEGMENT
Starter	One-Time Clean	■499–999	1 file cleaned, formatting fixed, duplicates removed, delivery via email	Students, freelancers, first-time buyers
Basic	Project Package	■1,999–3,499	Up to 3 files, data merge, basic dashboard (Sheets/Excel)	SMBs, businesses, one-off projects
Pro	Monthly Retainer	■3,999–5,999/mo	Weekly data cleaning + 1 Power BI/Sheets dashboard	Growing SMBs, repeat clients
Agency	White-Label	■8,000–15,000/mo	All Pro features + branded reports + dedicated support	Agencies, enterprises, large
Add-on	Template Sale	■199–799	Pre-built Excel/Sheets/Power BI template for specific use cases	All segments, passive, one-time

SECTION 07

Top 5 Risks & 30-Day MVP Plan

Top 5 Risks

#	RISK	IMPACT	PROB.	MITIGATION
1	No paying client in first 45 days → loss of momentum	CRITICAL	HIGH	Launch free trial immediately; set hard target: 1 paying client by Day 30
2	Underpricing → unsustainable; overpricing → no clients	HIGH	HIGH	Track hours per project from Day 1; price at ₹499 to start, raise after 5 clients
3	Data privacy concern stops SMBs from sharing files	MEDIUM	MEDIUM	NDA template on Day 1; delete client data within 7 days; communicate clearly
4	Burnout — too many clients, no system, stretched schedule	MEDIUM	MEDIUM	Cap at 3 clients/mo initially; build SOP and scripts to reduce delivery time
5	Content gets no traction — can't find first clients	MEDIUM	MEDIUM	Skip content for first 30 days; use direct outreach only for first 10 clients

30-Day MVP Action Plan

WEEK	FOCUS	KEY ACTIONS	SUCCESS MARKER
Week 1 Days 1–7	Research & Outreach	- List 50 potential customers - DM 20 with discovery request - Complete 10 customer interviews - Identify top 3 pain points	10 conversations completed
Week 2 Days 8–14	Portfolio & Proof	- Do 3 FREE data cleans for real people - Capture before/after screenshots - Post case study on LinkedIn - Set up Google Form + Notion page	3 free projects + 1 post published
Week 3 Days 15–21	Soft Launch & First Sale	- Announce service on LinkedIn/Instagram - DM 30 more warm contacts - Offer '5 spots only' ₹499 starter pack - Follow up all 10 interview contacts	1st paying client secured
Week 4 Days 22–30	Systemise & Iterate	- Build SOP + intake checklist - Collect testimonial from first client - Set Month 2 targets (5 clients, ₹15K MRR) - Review: What to keep, change, or drop	SOP done + 1 testimonial live

SECTION 08

Founder Action Sheet, Scores & Final Verdict

Top 10 Next Actions (This Week)

1	TODAY	Open a spreadsheet — list 50 people who might have data problems (LinkedIn, college, WhatsApp)
2	TODAY	Draft a 3-line DM: 'I'm researching data challenges for SMBs — would you do a 10-min call?'
3	Day 2	Send DMs to 20 people from your list — track replies in a Google Sheet
4	Day 3–5	Complete 10 customer discovery calls — record pain, tools, time lost, current workarounds
5	Day 5	Identify your #1 pain point from interviews — this becomes your positioning statement
6	Day 6	Ask 3 contacts for a real messy file — offer to clean it for free as a portfolio piece
7	Day 7	Clean the files using Python/Excel — document every issue you fix with screenshots
8	Day 8	Post a before/after case study on LinkedIn: 'I cleaned this in 2 hrs. Here's what I fixed.'
9	Day 9	Create a simple Notion page: What you do, Who it's for, Pricing, How to hire you
10	Day 10	Send your Notion link to 10 warm contacts and ask: 'Would you pay for this?'

Readiness Scores

Customer Clarity — How well you know WHO to serve		72
Problem Severity — How painful is the problem for customers		85
PMF Potential — Likelihood of Product-Market Fit in 6–12 months		68
MVP Readiness — How ready you are to launch RIGHT NOW		61

Final Verdict

STRONG DEMAND SIGNAL

The problem is real, the market is large, and you have the skills to deliver. This is not a product idea — it's a service business, and service businesses can start generating revenue within days, not months. Your only job right now is to find 1 person willing to pay █499 for a cleaner spreadsheet. Everything else — the website, the branding, the automation — comes after that.

█ Strong Demand Signal	█ Promising but Unvalidated	█ Weak Demand Signal	█ Low Demand Probability
------------------------	-----------------------------	----------------------	--------------------------
